

UNCLE RON'S AI TOOLS

Artificial Intelligence isn't going away folks. You can embrace it and do more, or fall further and further behind. Here is a list of my currently used tools.

Native AI Chat-bots:

Chat-GPT - Remember that it's not always up to date!

Bard - Google is making up ground and it's tied to their search engine data.

Writing Tool:

Frase - This is my homerun secret weapon. I will give deep details on this soon. There are other great products, but this is a mic drop.

Video Editing:

Descript - This has been a game changer. Transcription & editing in one place that's wicked easy!

Video Summary/Sharing:

Castmagic - Do you want AI to summarize and create social posts to help share your content? This is it!
